April 5, 1972

LETTER OF INTENT: CHEMSOL, DIVISION OF SCIENTIFIC
CHEMICAL PROCESSING, INC.
J. STORK

We have no alternative currently than to again have our waste product mixture containing methanol, phosphoric acid, water and contaminants removed during the period from August 1, 1972 through July 31, 1973.

We have an open project in which the recovery of our own methanol and phosphoric acid is considered. The value of this project will, in large part, be dependent on the terms for removal secured in the above mentioned period.
